Executive Summary

The **Business Process Reengineering (BPR) Program** is a high-impact executive training designed to help organizations radically redesign their core processes to achieve breakthrough improvements in performance, efficiency, and customer value. Inspired by the pioneering work of Michael Hammer and James Champy, the program introduces participants to modern methodologies for analyzing, redesigning, and optimizing business processes. Through practical frameworks, digital transformation tools, and real-world case studies, participants will learn how to eliminate inefficiencies, reduce operational costs, and accelerate organizational performance. The program also explores the integration of automation, AI-enabled process analytics, and process mining technologies. By the end of the program, participants will be equipped to lead large-scale process transformation initiatives that drive innovation, agility, and sustainable competitive advantage.
