## Executive Summary

The Construction Health & Safety Training program is designed to provide essential knowledge and practical skills required to manage safety effectively on construction sites. It focuses on identifying high-risk activities, implementing control measures, and ensuring compliance with international safety standards and regulations. The program emphasizes a proactive approach to risk management, enabling participants to prevent accidents, reduce incidents, and promote a strong safety culture across all project phases. It also addresses the unique challenges of construction environments, including working at height, heavy machinery operations, and site coordination. Through hands-on exercises, real-world case studies, and site-based scenarios, participants will gain the competence to enhance safety performance, protect workers, and ensure project continuity.
