## Executive Summary

The **Lean Supply Chain Practices Program** is designed to help organizations enhance operational efficiency by eliminating waste and optimizing supply chain processes. This program introduces the core principles of lean management and their application across procurement, production, logistics, and distribution activities. Participants will learn how to streamline workflows, reduce operational costs, and improve service quality through continuous improvement methodologies. The program also explores the integration of lean practices with digital tools and data-driven decision-making to create agile and responsive supply chains. By the end of the program, participants will be able to implement lean supply chain strategies that enhance productivity, resilience, and long-term organizational performance.
